Expertise in Undershirt,Underwear,Loungewear/Sleepwear,Seasonal Outerwear
& Kids/Toddler setvh

UNIQUE POSITIONING

Trendz Global is not an sourcing agency—we're your reserved space inside the South Asian apparel supply chain.

We bridge the gap between real-time production needs and long-term brand vision with factory-level access, speed, and trust. We are full-service private label apparel partner who acts like your own office on-site.

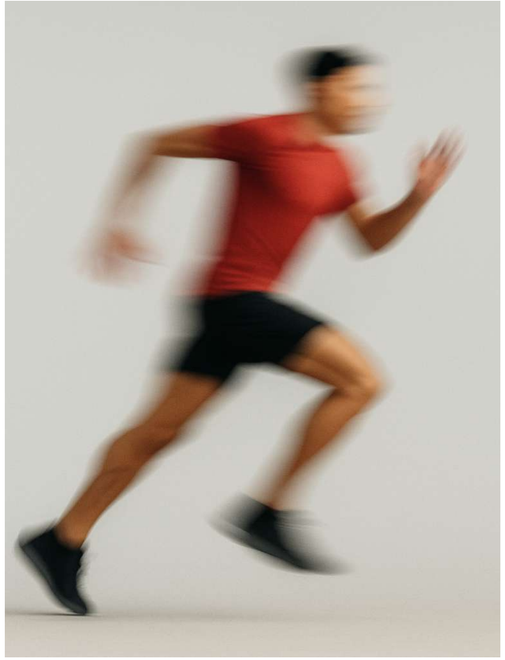
WHAT WE OFFER

AGILITY

Product execution by syncing with factories and buyers to adapt designs, timelines, and outputs in real time.



INNOVATION

Drive agile product innovation by aligning factories and buyers to rapidly adapt to trends, tech, and evolving consumer needs.

SUSTAINABILITY

Embeded into product Journey aligning with conscious factories & buyers to ensure responsible, future-ready production.

PRODUCTION SOLUTIONS

Supply Chain Models

1 BASICS MODEL

Predictable Hero Product that sells in peaks and troughs of Demand Cycles

(90 Days PO to Ex Factory)

2 CORE REPLENISHMENT

Identify hero products that sell on a season-less basis and replenish these products constantly

(30 Days PO to Ex Factory)

3 READ & REACT

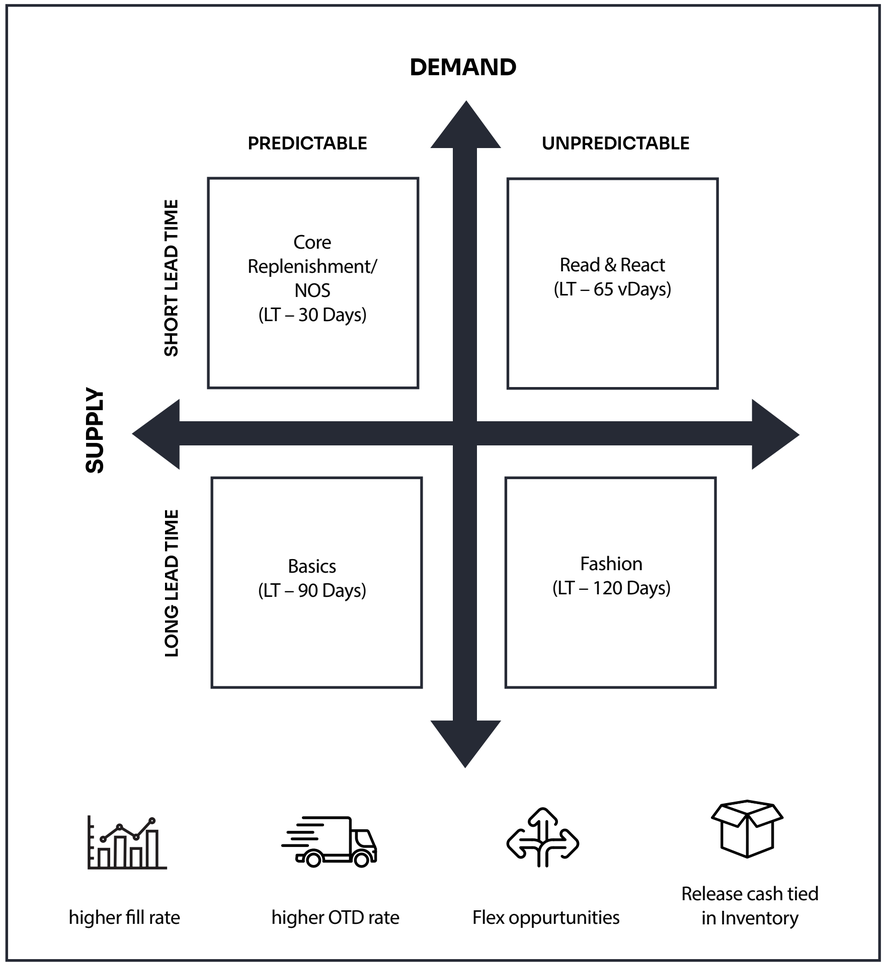
Utilize reactive analysis to track demand trends and ensure products are made available when needed

(65 Days PO to Ex Factory)

4 FASHION

Seasonal developments based on new developments of product and hfabric

(120 Days PO to Ex Factory)



PLANNING PRODUCTS

Solutions

1

Reduced Stockouts and Overstocks, ensuring optimal inventory levels across all channels

2

Higher profit margins which minimize markdowns and improves full-price sell through

3

Improve inventory turnover in comparison to peers in the industry

4

Reduces excess production, leading to lower waste and carbon footprint

TECH - ENABLED

Operations

PRODUCTION 360

Live production tracking powered by our in-house ERP system on Scalular.com.
Get real-time updates and tracking IDs for every order — full visibility, zero guesswork.

Optimized digital channels deliver real-time insights into product dissection and R&D.
Stay informed every step of the way — from material research to market-ready execution.

Full transparency with real-time ERP and email updates.
Live production reviews via scheduled video calls.

BEYOND PRODUCTION

Data scraping from the web & physical market/store visits to gain updates from shelves to ensure the flow state of the product.

Continuous R&D to refine product quality metrics tailored to core and recurring SKUs, based on regional performance.

Product traceability & transparency from raw material to finished good to make solid technical stance on a universal level.

End customer/Store response data will be maintained (ie.Amazon)

Manufacturing Capabilities

In House Sampling

In-House Sampling Unit

Equipped to handle end-to-end product development, from concept to prototype, ensuring seamless transition to bulk production.

Dual Support

Serves both buyers and factories to conduct R&D and sampling with trusted, scalable, and reliable sources aligned with final production standards.

Thread-Level Understanding

Every product is studied from the yarn stage—understanding fibre behaviour, fabric reaction, and construction—to ensure clarity and precision in final execution to know realistic capabilities of the production region.

Decision-Making Partner

Helps buyers and factories make informed decisions on materials, finishes, and construction methods to avoid future production setbacks.

Zero-Error Goal

Our R&D process is designed to eliminate future correspondence over quality mismatches or production concerns, laying the path for smooth, predictable scaling.
